

## SCIENCE

Diagram the constellations Brent sees and mentions throughout his journey. Find out the astrological meaning of each constellation. Label each constellation and attach an explanation of it near the each diagram. This should be no less than poster board size. Do a 250-300 word write-up explaining which star may hold the most meaning for Brent and why you chose the star you did. Find supporting evidence from the text to strengthen your opinion.

## ART

Think about Brent's journey and how he changes along the way as a result of building the whirligigs. Design and build a whirligig to atone for something you have done or to honor someone you know. Include an explanation of what the whirligig stands for and why you chose to build it.

**All projects will be presented to the class. The student will explain his/her project and answer any questions the class may have. This will be part of the grade.**
